REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Hoene (4,172,102) teaches a composition comprising unsaturated polyester, unsaturated monomer and a graft copolymer containing a principal chain that can be a styrene copolymer and a side chain of polyalkylene ether. The composition may further comprise addition polymerized polymer. Hoene teaches that the amount of unsaturated monomer used in preparing the graft copolymer is at least 70% and preferably 80% by weight of the total of the monomer and polyalkylene ether and that it is preferred that the graft copolymer be used in amounts of at least 10 % by weight. Thus, Hoene teaches away from using a graft copolymer having a weight ratio of principal chain to side chain of 65/35 to 20/80 in amount of 0.1 to 10 parts as required in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
